

GEOCHALLENGE

EMPOWERING CURIOUS MINDS
TO SOLVE TODAY'S URGENT ENVIRONMENTAL PROBLEMS.

ARE YOUR STUDENTS UP FOR THE CHALLENGE?

The GeoChallenge is a project-based, multi-leveled competition for grades 4-8 that empowers young people to change the world. This year, sign up a team of students to help solve the urgent problem of plastic pollution in our waterways. Teams will use teamwork, map-making, model building, and video production to create and present real-world solutions, just like National Geographic Explorers.
